Experience

Repwise — Jan 2024 - Current
Front-End Software Engineer — Sandton
https://www.repwise.co.za/

Key Responsibilities

- Development: Develop and maintain the front-end of web applications using jQuery and Kendo UI jQuery within an MVC framework.
- Integration: Integrate front-end components with the C# backend, ensuring seamless data flow and functionality.

User Interface and Experience

- **UI Development**: Design and implement user interfaces that are responsive, intuitive, and visually appealing.
- **UX Optimization:** Focus on delivering a high-quality user experience by implementing best practices in front-end development.

Principles and Implementation

- **OOP Principles:** Apply OOP principles to organize code efficiently, making it reusable, modular, and easy to maintain.
- **Class and Object Management:** Create and manage JavaScript classes and objects to encapsulate data and behavior, improving code structure and readability.

Cross-Functional Teamwork

- **Team Collaboration:** Work closely with back-end developers, designers, and other stakeholders to ensure a cohesive development process.
- **Feedback:** Participate in regular team meetings and code reviews to provide and receive feedback, ensuring continuous improvement and adherence to project requirements.

Code Quality and Maintenance

- **Code Quality:** Write clean, maintainable, and efficient code following industry standards and best practices.
- **Debugging and Troubleshooting:** Identify and resolve front-end issues and bugs, ensuring optimal performance and user satisfaction.

Learning and Development

- **Skill Enhancement:** Stay updated with the latest trends and advancements in front-end development technologies and frameworks.
- **Innovation:** Propose and implement innovative solutions to improve the functionality and performance of web applications.

Performance

- **Optimization:** Optimize web applications for maximum speed and scalability.
- **Testing**: Conduct thorough testing of front-end components to ensure compatibility across different browsers and devices.

Modular Development

- **Component-Based Architecture:** Develop reusable components and modules to streamline development and maintenance.
- **Code Reusability:** Leverage modular code structures to improve the maintainability and scalability of the application.

Ikhokha Card Machines and Online Payment Tools — July 2021- Dec 2023
Front-End Software Engineer — Umhlanga
https://www.ikhokha.com/

Visuals and Features

- **Technologies Used: HTML 5, CSS 3 (SCSS), GraphQL, JavaScript (React / Next.js).**
- **Tools: Hubspot CLI, Sanity.io.**
- **Tasks:** Developing user-oriented visuals and features to enhance user experience.
- Creating optimized landing pages for cross-browser compatibility to support marketing efforts
- Designing site layouts and user interfaces following best practices.
- Improving navigation, enhancing visuals, and strengthening search engine rankings.
- Working in a multidisciplinary team including back-end developers and UX/UX designers.
- Responsive and Adaptive Design: Ensuring designs are responsive and adaptive to various devices.
- **SEO**: Understanding and implementing SEO principles.

Building Features

- **Hubspot CMS:** Utilizing React boilerplate to build new features.
- **Shopify:** Using Shopify GraphQL admin and storefront API to create engaging shopping experiences.

Event Tracking

- **Tools: Mparticle SDK.**
- **Integration: Implement events to track and log user activity, supported by Braze, Facebook, Google, and Mixpanel.**

Hubspot Development (Module Building and Landing Page Development)

- **Technology:** HubL, React.js and TypeScript.
- **Task:** Developing Hubspot modules for various functionalities.

Collaboration and Understanding Business Requirements

- **Role:** Collaborating with a BA to understand and implement business requirements.
- Working with the marking team to build campaigns

Prototyping and Feedback

- **Task:** Building high-quality mock-ups and different design prototypes.
- **Feedback:** Gathering user and customer feedback, and making suggestions for improvements.

Graphic Design Applications

- **Tools:** Adobe Suite XD and Figma

Content Management Systems

- Hubspot CMS.
- Sanity.io

Troubleshooting and Testing

- **Task**: Identifying and troubleshooting website issues and coding problems.

Testing/Debugging: Ensuring the website functions correctly.

Reason for Leaving: I was not happy with the direction of the company

Mr. Price Apparel — July 2016 – June 2021
Front End Web Developer — Durban
https://www.mrp.com/home

Visuals and Features

- **Technologies Used**: HTML 5, CSS 3, JavaScript, React.js, MongoDB, Node.js, Express.js, Mongoose, Cheerio.
- **Tasks**: Developed user-oriented visuals and features to enhance user experience.
- Created optimized landing pages for cross-browser compatibility to support marketing efforts.
- Successfully executed full website redesigns to enhance navigation, visuals, and search engine rankings.
- Designed site layouts and user interfaces following best practices.
- Site Layout and UI Design
