PROFESSIONAL EXPERIENCE

Organisation:	Repwise
Dates:	January 2024 – Present
Position:	Front-End Software Engineer
Technologies:	jQuery & Kendo UI jQuery MVC C# JavaScript

What I Do:

Development:

- Develop and maintain the front-end of web applications using jQuery and Kendo UI jQuery within an MVC framework.
- Integrate front-end components with the C# backend, ensuring seamless data flow and functionality.

User Interface and Experience:

- Design and implement user interfaces that are responsive, intuitive, and visually appealing.
- Focus on delivering a high-quality user experience by implementing best practices in front-end development.

Principles and Implementation:

- Apply OOP principles to organise code efficiently, making it reusable, modular, and easy to maintain.

- Create and manage JavaScript classes and objects to encapsulate data and behaviour, improving code structure and readability.

Cross-Functional Teamwork:

- Work closely with back-end developers, designers, and other stakeholders to ensure a cohesive development process.
- Participate in regular team meetings and code reviews to provide and receive feedback, ensuring continuous improvement and adherence to project requirements.

Code Quality and Maintenance:

- Write clean, maintainable, and efficient code following industry standards and best practices.
- Identify and resolve front-end issues and bugs, ensuring optimal performance and user satisfaction.

Learning and Development:

- Stay updated with the latest trends and advancements in front-end development technologies and frameworks.
- Propose and implement innovative solutions to improve the functionality and performance of web applications.

Performance:

- Optimise web applications for maximum speed and scalability.
- Conduct thorough testing of front-end components to ensure compatibility across different browsers and devices.

Modular Development:

- Develop reusable components and modules to streamline development and maintenance.
- Leverage modular code structures to improve the maintainability and scalability of the application.

Reason for Leaving Organisation: Looking for a new challenge.

Organisation: iKhokha

Dates: July 2021 – December 2023

Position: Front-End Software Engineer

Technologies: HTML 5 | CSS3 (SCSS) | GraphQL | JavaScript | React / Next.js | HubSpot CLI / CMS | Sanity.io | Shopify | mParticle SDK | Mixpanel | HubL | TypeScript | JSON | Adobe Suite (XD, Illustrator, Photoshop)

What I Did:

Visuals and Features:

- Developed user-oriented visuals and features to enhance user experience.
- Created optimised landing pages for cross-browser compatibility to support marketing efforts.
- Designed site layouts and user interfaces following best practices.
- Improved navigation, enhancing visuals, and strengthening search engine rankings.
- Worked in a multidisciplinary team including back-end developers and UX/UX designers.
- Ensuring designs were responsive and adaptive to various devices.
- Understood and implemented SEO principles.

Building Features:

- Utilised React boilerplate to build new features in HubSpot CMS.
- Used Shopify GraphQL admin and storefront API to create engaging shopping experiences.

Event Tracking:

- Implemented events to track and log user activity, supported by Braze, Facebook, Google, and Mixpanel (mParticle SDK).

HubSpot Development:

- Developed HubSpot modules and landing pages for various functionalities.

Business Requirements:

- Collaborated with a BA to understand and implement business requirements.
- Worked with the marketing team to build campaigns.

Prototyping and Feedback:

- Built high-quality mock-ups and different design prototypes.
- Gathered user and customer feedback and made suggestions for improvements.

Troubleshooting and Testing:

- Identified and troubleshooted website issues and coding problems.
- Ensured the website functioned correctly.

Reason for Leaving Organisation: Wanted a different environment.

Organisation: Mr Price Apparel

Dates: July 2016 – June 2021

Position: Front-End Web Developer

Technologies: HTML5 | CSS3 (SCSS) | JavaScript | React.js | MongoDB | Node.js | Express.js | Mongoose | Cheerio | JSON | Adobe Suite (Illustrator, Photoshop) | Figma | Magneto

What I Did:

Visuals and Features:

- Developed user-oriented visuals and features to enhance user experience.
- Created optimised landing pages for cross-browser compatibility to support marketing efforts.
- Successfully executed full website redesigns to enhance navigation, visuals, and search engine rankings.
- Designed site layouts and user interfaces following best practices.

Site Layout and UI Design

- Created tools to help the team work faster, including web scraping tools.
- Identified and resolved various website issues and coding problems through meticulous testing and debugging.
- Produced high-quality mock-ups and prototypes, incorporating user feedback to refine solutions.
- Implemented responsive and adaptive design strategies, upholding SEO principles.

Hosting and Design Tools:

- Used Heroku to host the web app.
- Demonstrated proficiency in graphic design applications such as Adobe Suite (Adobe Illustrator and Photoshop) and Figma.
- Worked with content management systems (Magento).

Reason for Leaving Organisation: I wanted to diversify my technology experience.

Organisation:	iX Online Motoring
Dates:	January 2015 – June 2016
Position:	Website Editor
Technologies:	HTML5 CSS3 JavaScript jQuery
Overview:	

I joined iX in 2015 as Website Support, and within a year, I was promoted to Website Editor.

What I Did:

- As Website Editor, I curated and enhanced web content to create engaging and responsive online presences for various clients, and developed responsive websites, ensuring optimal functionality and visual appeal. I implemented responsive design principles, delivering seamless user experiences across different devices and platforms, and
- Managed ongoing content updates and maintenance, keeping websites up to date with the latest information, trends, and developments. I worked closely with designers, developers, content creators, and stakeholders to maintain a cohesive and unified online presence.
- In my first role as Website Support, I conducted regular reviews of the website to identify and fix technological problems, ensuring the website remained responsive, usable, and fully functional. I worked with the web development team to implement necessary modifications (such as content additions, design upgrades, and feature enhancements), and also served as the first point of contact for website users – addressing inquiries, concerns, and technical issues through chat, email, or phone promptly, helping customers navigate the website, locate information, and resolve difficulties. My primary goal was to strive for a first-contact resolution to ensure customers received accurate and timely assistance, maintaining high satisfaction levels. I investigated and troubleshooted technical issues related to the website, working with IT and development teams to diagnose and resolve complex problems. In addition, I maintained a thorough understanding of the website's backend systems and databases, and expedited issue resolution by leveraging comprehensive system knowledge.

Reason for Leaving Organisation: Career growth.

TECHNICAL PROFICIENCY

- React.js | Next.js | Node | Express | MongoDB | JavaScript | Bootstrap | Cascading Style Sheets (CSS) | SCSS
- JavaScript Object Notation | GraphQL | TypeScript | Rest API | GitHub | Adobe Photoshop | Figma
